Compact Performance

Power Dense and Rugged Parallel Shaft DC Gearmotors

GIL200 gearmotors provide up to 300 inch pounds of continuous torque in a small package.

- Available with a wide selection of performance-matched DC motors with NEMA Class F Insulation
- Available with output speeds to 350 RPM
- Ratios from 11.1 to 232:1
- Drop-in replacement for popular units
- GIL200 gearmotors. They are all about driving down your costs
RAE GIL200 Parallel Shaft DC Gearmotors.  
High Torque, Compact and Rugged

GIL200 Series gearmotors, when matched with the appropriate RAE motor, provides high output torque in a compact, rugged die cast parallel shaft gearmotor design.

**Features**
- Gearbox Designed to AGMA Standards
- Oil Lubrication
- Needle Bearings (Gearbox)
- High Energy Ceramic Magnets
- Double Shielded Ball Bearings (Motor)
- Dynamically Balanced Armature
- Reversible Design
- TENV Enclosure
- Externally Replaceable Brushes
- Auto-Hook Tang Type Commutator
- Drop-in Replacement for Popular Units
- Value Added Options and Modifications Available

**RAE Compatible Motors**
The GIL200 Series may be combined with the M1600, M4000, M6000 or Opti 4000 Series motors.

**Quality Assurance**

A Strong Quality Assurance Commitment – 100% Testing

At RAE, quality consciousness is inherent in the production process from start to finish. Our stringent testing process includes:
- AQL sampling of incoming components
- In-process quality checks
- Meeting UL and CSA certification standards
- 100% dynamically balanced and electrically tested armature assemblies
- Hi-pot testing as well as speed and current testing at no load
- Minimum 30-minute product run-in testing

Practical Design

Depending on the RAE motor series chosen, the L1 dimension will be from 4.95” to 8.23.” The L2 dimension will be from 2.37” to 3.45.”

**Bluffton – A Wide Selection of Solutions to Meet Your Needs**

- AC Motors
- Washdown Motors
- Speed Reducers
- DC Gearmotors
- AC Gearmotors
- DC Controls
