Item # S-310, C215 Isolation Module for D280-S-Shape-Pattern Generator

C215 Isolation Module for D280-S-Shape-Pattern Generator

The C215 input isolation module is designed to be used in conjunction with the IPC D280 S-Shape speed pattern generator to provide complete signal isolation between the control and connected circuitry. The C215 provides 14 discrete isolated inputs and provides LED indicators for each which aids in setup and troubleshooting. Designed to be used in systems where noise interference is a problem. Can be directly interfaced to Relay, Microprocessor or PLC based controllers from most manufacturers. Includes a spare input. Requires +24 vdc.
